

S01- Text to Audio

The screenshot displays a REST client interface within a workspace named "Reka mano's Workspace". The left sidebar shows a collection of API endpoints under "GenAI-Jul-HomeAssignment", with "POST S01-Text to Audio" selected. The main panel shows a POST request to the URL `https://api.groq.com/openai/v1/audio/speech` using the "Groq_API_Env" environment. The request body is a JSON object:

```
1 {
2   "model": "canopylabs/orpheus-v1-english",
3   "input": "[Cheerful] vanakkam. I am a language model created by Groq. I am here
4     to help you with any questions you may have. How can I assist you today?",
5   "voice": "diana",
6   "response_format": "wav"
7 }
```

The response status is "200 OK" with a duration of 1.69 s and a size of 402.39 KB. The response body is a black rectangle, likely representing an audio file. The interface includes tabs for "Docs", "Params", "Authorization", "Headers 12", "Body", "Scripts", and "Settings". The bottom status bar shows "Local View" and "Console".

S02- MultiLingual
