Status of Resume zip file Ingestion

📁 Final Ingestion Status — All 199 Files

📁 Folder Breakdown

Total files in folder : 199

└ Non-PDF (docx/doc) : 19 [SKIPPED – format not supported]

└ PDF files : 180

└ Ingested into MongoDB : 166 ✓

└ Failed (unprocessable) : 14 ✗

Note on the 168 vs 166 discrepancy: The DB shows **168 docs** because **2 resumes were pre-ingested** before the batch script started (as you mentioned) — those 2 are already in DB but their filenames may not perfectly match the current folder filenames (the batch script skipped them as duplicates by fileName match).

✓ **166 PDFs — Successfully Ingested into MongoDB**

(all listed in console output — 166 files from both pre-ingested + all batch runs)

✗ **14 PDFs — Permanently Failed (Not Groq TPD — Structurally Unprocessable)**

19 Non-PDF Files — Skipped (Format Not Supported)
